GOAT ANTI MOUSE IgG/A/M (H/L)

Clone no. -

MONOSAN

Additional info

Goat anti Mouse IgG/A/M reacts with the heavy and light chains of all major classes of mouse immunoglobulin. The antibody has been adsorbed against human serum to minimise cross-reactivity with human immunoglobulins. Storage: Store at -20°C only. Storage in frost-free freezers is not recommended. This product should be stored undiluted. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.
