MONOSAN

Additional info

Goat anti Mouse IgG/A/M reacts with the heavy and light chains of all major classes of mouse immunoglobulin. The antibody has been adsorbed against human serum to minimise cross-reactivity with human immunoglobulins.

Storage: This product is shipped at ambient temperature. It is recommended to aliquot and store at -20°C on receipt. When thawed, aliquot the sample as needed. Keep aliquots at 2-8°C for short term use (up to 4 weeks) and store the remaining aliquots at -20°C. Avoid repeated freezing and thawing as this may denature the antibody. Storage in frost-free freezers is not recommended. This product is photosensitive and should be protected from light.
