Flow Cytometry Purified Antibody

A Reliable Research Partner in Life Science and Medicine

High Specificity

High Sensitivity

High Batch Stability

Features of Elabscience® Purified Antibody

High Specificity

Strict Validation: The antibody was verified using multiple sample types, including Flow Cytometry (FACS) negative cells, positive cells, and peripheral blood, to confirm no cross-reactivity.

High Sensitivity

Low Background Interference: Optimized antibody selection and purification to minimize non-specific binding, enabling detection of rare cell subsets.

High Batch Stability

Batch Consistency: Each batch of antibodies undergoes rigorous QC testing (Flow Cytometry titration assays) to ensure data reproducibility.

High Stability: The antibody was stored at 37°C for 1, 3, 7 days, maintaining a highly consistent signal, confirming excellent product stability.
