

Universal Stem Cell Kits

Celprogen offers a universal stem cell culture system for human, mouse, and rat stem cell cultures. The culture stem cell kits (cord blood origin for human and embryonic stem cells for mouse and rat) in undifferentiated form with undifferentiated media and undifferentiated matrix set. The expansion media and expansion matrix can expand the population of undifferentiated stem cells. The differentiation media and differentiation matrix set differentiate these stem cells into endodermal, mesodermal, and ectodermal tissues. These differentiated stem cells are expanded by expansion media and expansion matrix.

The recommended order size of each matrix is 6 packs per 500 ml. It is necessary to purchase T25 flasks (for initial culture and differentiation) and T75 flasks (for expansion culture) as a set.
