

## The ibidi Chambered Coverslips

Versatile  $\mu$ -Slides  
for Advanced Microscopy

- ✓ Available with 1–18 wells for experimental flexibility
- ✓ Multiple surface options to suit your research needs
- ✓ Exceptional optical clarity for high-end imaging

“

*I tested the  $\mu$ -Slide 18 Well and the  $\mu$ -Slide 8 Well<sup>high</sup>. I used them for confocal microscopy.*

*I can say that I am very pleased with these products! Super **easy to use** and **very convenient**.*

Rita Ribeiro  
University of Lisbon, Portugal

### The ibidi Chambered Coverslip Variety

	1 Well	2 Well	4 Well	8 Well <sup>high</sup>	18 Well
Bottom	 	 	 	 	 
Volume per well	3 ml	1.5 ml	700 $\mu$ l	300 $\mu$ l	100 $\mu$ l
Growth area per well	10.6 cm <sup>2</sup>	5.1 cm <sup>2</sup>	2.5 cm <sup>2</sup>	1.0 cm <sup>2</sup>	0.34 cm <sup>2</sup>

# The ibidi Chambered Coverslips

Versatile  $\mu$ -Slides for Advanced Microscopy

## The Principle of Imaging Chambers: The Coverslip Bottom

The outstanding characteristic of the ibidi  $\mu$ -Slides is their thin coverslip bottom, which has excellent features for high-end microscopy applications. In comparison, the bottom of standard cell culture plastics is about 1 mm thick—which is more than 5 times the thickness of the coverslip and, therefore, not ideal for imaging.

### ibidi Polymer Coverslip

POLYMER  
COVERSLIP

The ibidi Polymer Coverslip Bottom is suitable for various imaging techniques up to the highest resolution. With a standard #1.5 coverslip thickness of 180  $\mu\text{m}$  (+10/-5  $\mu\text{m}$ ), it meets all optical requirements for microscopes. The ibidi Polymer Coverslip is compatible with a variety of immersion oils, which are specified at [ibidi.com/oil](http://ibidi.com/oil).

### ibidi Glass Coverslip

GLASS  
COVERSLIP

The ibidi Glass Coverslip Bottom was developed specifically for TIRF, super-resolution microscopy, and single molecule microscopy. However, it is also ideally suitable for standard imaging techniques. The D 263 M Schott borosilicate glass has a #1.5H thickness of 170  $\mu\text{m}$  (+/-5  $\mu\text{m}$ ) and unrestricted immersion oil compatibility.

## Surfaces and Coatings for the ibidi Polymer Coverslip

### ibiTreat (Tissue Culture-Treated)

Excellent adhesion of adherent cells, hydrophilic surface with no need for any additional coating.

### Hydrophobic, Uncoated Surface

Weak adhesion of adherent cells, suitable for the application of specific coatings.

### Bioinert (ULA) Surface

No adhesion of adherent cells or any biomolecule, ideal for spheroid and organoid culture.

### Coated Surface

Culture of adherent cells on a Collagen I, IV, or Poly-L-Lysine surface.

## Surfaces for the ibidi Glass Coverslip

### Glass Surface

Adhesion of adherent cells (coating might be required), ideal for special microscopy applications.

*Immunofluorescence of human vascular endothelial cells (HUVECs) in a  $\mu$ -Slide 18 Well ibiTreat. Red: alpha-Tubulin, green: F-actin, blue: nuclei.*
